

Keathley Landscaping Expands Grass Installation Service to Transform Yards in One to Three Days

August 14, 2026

GARLAND, TX - August 14, 2026 -

Keathley Landscaping, a full-service landscaping company operating across the Dallas region since 2002, has expanded its professional sod services to help homeowners convert bare, uneven, or worn-out yards into established green lawns in as little as one day. The expanded offering addresses growing demand from property owners seeking faster, more reliable ways to establish healthy turf without the extended wait associated with seeding.

The company reports that most residential projects can be completed within a single day, while larger properties typically require up to three days. The work covers several turf varieties suited to North Texas conditions, including St. Augustine, Zoysia, and Bermuda grass, allowing each installation to be matched to the sun exposure, soil, and drainage characteristics of a given property.

Proper turf establishment depends on more than laying sod. According to the company, site preparation, grading, and drainage play a central role in whether a new lawn takes root and remains healthy over time.

Keathley Landscaping combines its grass installation service with drainage expertise, an approach led by owner Logan Keathley, who holds certification as an NDS Certified Drainage Contractor. That background allows the company to identify and correct underlying water problems that often cause new lawns to fail.

"A lawn is only as healthy as the ground beneath it," said Logan Keathley, owner of Keathley Landscaping. "Many yards that struggle are dealing with poor grading or hidden drainage issues. Addressing those conditions before the sod goes down is what separates a lawn that lasts from one that has to be replaced in a season."

The company works with homeowners across Dallas, Garland, Wylie, Plano, and surrounding communities. Beyond turf, Keathley Landscaping provides drainage solutions ranging from French drains and grading to custom-designed buried drainage systems, along with landscape design and construction, patios, fences, pergolas, decks, stonework, flowerbeds, and ongoing lawn care and maintenance.

Keathley noted that timing and preparation remain important considerations for property owners planning turf work. "Homeowners often underestimate how quickly a yard can be established when the groundwork is done correctly," he said. "The goal is a lawn that looks good the day it is installed and continues to thrive for years afterward."

The expanded grass installation service reflects a broader focus on pairing turf establishment with the drainage and site work that supports long-term lawn health. By handling both elements together, the company aims to reduce the common problems that lead to failed or patchy lawns in the region.

Keathley Landscaping has operated in the Dallas area since 2002, providing landscape design, construction, drainage solutions, and lawn care services to residential clients. The company focuses on practical, affordable solutions and works closely with homeowners to plan and complete projects suited to their properties and outdoor needs.
